

Stress is a proven risk factor for many serious illnesses, including depression and heart disease. It may contribute to other health problems such as insomnia and high blood pressure. For these reasons and more, it's important to control your daily stress, have enough sleep and rest. The Nostress™ formula improves the human stress response reorganizing energy reserves. It increases the adaptive capacity of the individual. This formula helps replenish and sustain the body during stress, decreases fatigue, melancholy or nervousness, poor concentration, and overall weakness. It increases energy production and promotes a stable emotional state, as well as decreases symptoms of the generalized anxiety.

An extremely weak emission of electromagnetic waves emitted by biological systems in the optical range of spectrum is known as a biophoton emission. This phenomenon is observed in all living cells of plants, animals and human beings. It cannot be seen by the naked eye but can be measured and recorded using a special equipment. It has been found that a biophoton emission is the steering mechanism behind all biochemical reactions.

Bio Resonance Technology (BRT) gives us a possibility to record a holographic image of the unique biophoton network that is characteristic for every existing herb or plant, enhance it substantially and after that "recorded" back to the carrier making its original healing qualities much stronger. This way BRT makes the best components that we use in our products, unbeatable.

Using of BRT allows us to significantly increase the efficacy of the supplements, and reduce the dose of the formula.

INGREDIENTS:

Centella Asiatica (Mandukaparni), Convolvulus Pluricaulis (Shankhpushpi), Withania Somnifera (Ashwagandha), Glycyrrhiza Glabra (Yastimadhu), Asparagus Racemosus (Shatavari), Turmeric (Haldi), Inositol, Isomalt

Centella Asiatica (Gotu Kola) has been called "a pharmacy in one herb". It is classified as one of the Brahmi herbs for its brain enhancing and anti-aging, longevity-producing properties. It is also known as the elixir of life. In India, Gotu Kola has been used as a Medhya Rasayana.

Convolvulus Pluricaulis (Shankhpushpi), is a very important herb used in Ayurveda due to its therapeutic benefits. It helps enhancing brain powder, improving memory and concentration and increasing ability to recall. Therapeutically, it is beneficial for sleeplessness, stress disorders, mental debility or sensitivity.

Curcumin, an active compound in Turmeric, is known for its antioxidant and anti-inflammatory activity that can promote healing. Studies have found that Turmeric may have pain-reducing power equal in some cases to that of prescription and over-the-counter medications.

Ashwagandha (Withania Somnifera) is widely utilized in Ayurveda and is deemed an "adaptogen," a herb that protects the body from stress and helps it to address the effects of stress. It has been shown to decrease cortisol levels in persons under chronic stress, restore healthy adrenal function, and normalize the sympathetic nervous system.

Glycyrrhiza Glabra (Licorice root) is an anti-stress herb known to increase energy, endurance and vitality, and act as a mild tonic. It has been used to stimulate the hormones for anti-inflammatory action, as well as naturally fortify cortisone levels—arguably the most important hormone in stress and adrenal fatigue.

Asparagus Racemosus (Shatavari) is the 'Queen of Ayurvedic herbs'. It is an adaptogenic herb, able to help the body cope with physical and emotional stress. It is considered to be a general health tonic to help rejuvenate both body and mind.
